

Radion Diffuser

Models available for XR15 and XR30 Radion Lights

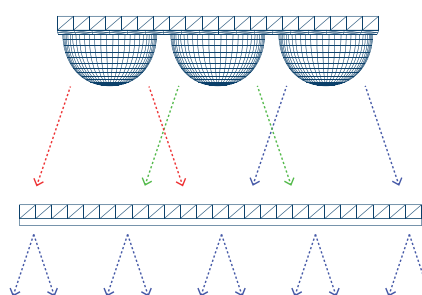

FEATURES

- Engineered diffuser material for improved color mixing and caustics
- Quick and easy installation
- Magnetically attached lens for easy removal and cleaning
- Only a 25% reduction in PAR output
- Compatible with all Radion versions

HOW IT WORKS

The Radion diffuser utilizes an engineered diffuser material with an optimized airspace, the result is enhanced color mixing and more uniform caustics. Working with the existing optics equipped on the Radion fixtures, a diffuser offers a more pleasing light appearance with only a marginal reduction in PAR.
